Premium

Premium is what you pay us for this policy. It's the amount we've calculated to accept the risk of insurance under this policy. It also includes any discounts you've received, GST and other applicable government fees, duties and charges.

When calculating your premium we take a number of factors into account, including the cover you have chosen and:

Factor	Description
Information about your rental property	Including its location, types of construction materials, when your rental property was built, the type of building it is, the type of any swimming pool or spa it has, its number of storeys and the extent to which any part of it is above or below the ground.
The sum insured of the buildings and/or contents	The higher the sum insured for your rental property and/or contents you have selected, the higher your premium will be.
How the property is rented	Your premium will be higher if you rent the property out to paying guests for short term purposes, compared to if you rent it out to tenants as their primary residence.
Information about anyone covered	Including the age of the oldest insured and any buildings or contents insurance claims made by anyone covered in the relevant three year period. Your premium may be higher depending on the type of incident, and how long ago it was.
Claims made on your policy	Your premium may be higher for up to three following policy years, after one or more claims on your policy.
Your selected Basic Excess	The higher the Basic Excess you have selected, the lower your premium will be.
Your payment frequency	Your premium will be lower if you pay for your policy annually instead of by instalments.

Information relating to premium calculation

The list of factors above is not exhaustive. We may take other factors into account and add or remove factors. The importance we place on the factors we use to calculate the premium and how the factors combine, all affect calculation of the premium. Some factors will not affect all components of the premium and all components of the premium may not be subject to discounts in the same way or at all.

How the factors combine to calculate premium may also be impacted according to your circumstances and other commercial factors. The premium, determined by a combination of the factors, may be adjusted up or down to reflect your circumstances and underwriting considerations including the risk being insured and the value of any claims. An underwriting adjustment may limit premium increases and decreases from the combination of the factors and any discounts.

Your previous year's premium is taken into account on renewal and may limit premium increases from the combination of the factors and any discounts.

The premium we calculate according to the rating factors, your circumstances and other commercial factors, including taxes and government charges, will be shown on your Certificate of Insurance.

Cover options

An additional premium applies when you add the option to your policy:

Rent Default by Tenant

The additional premium for this option is determined based on your weekly rental income, any rent default claims made by anyone covered in the relevant three year period, any rent default claims made on your policy in the prior three years, and your other policy details.

Renewals

Each time you renew your policy, your premium is likely to change even if your insured circumstances haven't changed. This is because we use many factors to set your premium.

When we set your renewal premium, we consider how much it was before, and we may limit any increase in that renewal term.

Discounts

We may offer discounts or other special offers from time to time. A discount that you have received will be displayed in the premium breakdown on your Certificate of Insurance or else included within your premium. GST and government charges are applied to the premium after all discounts and savings are applied.

Discount type	Description
Combined Policy Discount	A 10% discount is automatically applied when you take out both buildings and contents cover for the same address under the one policy.

Excess

In most cases, you'll need to contribute an amount towards the cost of a claim.

The table on the next page explains the excesses that apply to common claim types. For other types of claims, we'll tell you what excesses apply when you make a claim.

Please refer to your Certificate of Insurance for the excesses that apply to your policy.

You should read the PDS and your Certificate of Insurance for full details of cover including the policy limits, conditions and exclusions which apply to your policy.

Each claim example uses AUD currency, inclusive of GST, and assumes the claimant is not registered for GST.
